

Store Manager Retail Insight Report

Executive Snapshot

- Period analysed: 2026-08-01 to 2026-08-31.
- Revenue: Rs. 4,004,642; units sold: 5,041; invoices: 2,249.
- Average bill value: Rs. 1,781.
- Highest revenue calendar date: 2026-08-15 with Rs. 204,359.

Question 1 Product Performance

Gross margin is revenue less product cost from product_master.csv; it is not net profit.

Top 3 products by units sold:

Product	Units	Revenue	Gross Margin (Rs.)	Gross Margin (%)	Revenue Share (%)
Basic Crew T-Shirt	576	227,829	136,821	60.1%	5.7%
Cotton Kurti	357	356,643	212,058	59.5%	8.9%
Graphic Tee	318	157,235	92,045	58.5%	3.9%

Bottom 3 products by units sold:

Product	Units	Revenue	Gross Margin (Rs.)	Gross Margin (%)	Revenue Share (%)
Scarf	11	5,040	2,785	55.3%	0.1%
Cap	22	6,578	4,268	64.9%	0.2%
Anarkali Kurta Set	25	36,160	15,535	43.0%	0.9%

Evidence notes for the slowest products:

- Scarf: 11 units, Rs. 5,040 revenue; possible reason: no SKU-level stockout evidence, so slow movement looks demand-led.
- Cap: 22 units, Rs. 6,578 revenue; possible reason: no SKU-level stockout evidence, so slow movement looks demand-led.
- Anarkali Kurta Set: 25 units, Rs. 36,160 revenue; possible reason: no SKU-level stockout evidence, so slow movement looks demand-led.

Question 2 Size and Inventory

- Assignment size demand is calculated only for alpha apparel sizes: XS, S, M, L, and XL.
- Size M shows the strongest alpha apparel stock pressure: 924 units sold and 31 SKU-level stockout days.
- Size XS is the slowest alpha apparel size: 146 units sold and about 40.1 days of cover at the end of the period.
- Order more depth for size M in proven fast products, and order less new depth for size XS until movement improves.
- Other size systems such as footwear/kids/OneSize are excluded from the assignment size chart to avoid mixing size systems.

Question 3 Trading Days

- Strongest weekday: Saturday with Rs. 178,132 average revenue per trading day.
- Slowest weekday: Tuesday with Rs. 86,588 average revenue per trading day.
- A small slow-day offer is worth testing, but the result should be measured against later same-weekday trading because this data does not prove promotion causality.

Question 4 Customer Patterns

Category lift compares each segment's category share with the overall store category share. Only patterns with at least 40 support units are shown.

Segment	Category	Segment Share %	Store Share %	Lift	Support Units	Business Meaning
Female - Adult (31-45)	Ethnic Wear	24.5%	17.1%	1.43x	206	Ethnic Wear takes 1.43x its store-average share in this segment; use this as a merchandising test signal.
Female - Young Adult (20-30)	Accessories	7.2%	5.6%	1.29x	81	Accessories takes 1.29x its store-average share in this segment; use this as a merchandising test signal.
Female - Senior (46+)	Ethnic Wear	21.1%	17.1%	1.23x	40	Ethnic Wear takes 1.23x its store-average share in this segment; use this as a merchandising test signal.
Male - Teen (13-19)	Tops	46.6%	40.5%	1.15x	167	Tops takes 1.15x its store-average share in this segment; use this as a merchandising test signal.
Male - Senior (46+)	Tops	45.8%	40.5%	1.13x	92	Tops takes 1.13x its store-average share in this segment; use this as a merchandising test signal.

- These are simulated monthly patterns and not real demographic claims.

Question 5 Exactly 3 Actions for Next Week

- 1. Reorder the strongest alpha apparel size pressure point first: size M has 31 SKU-level stockout days and 924 sold units.
- 2. Give front-of-store space to Basic Crew T-Shirt and reduce new buying for Scarf until its sell-through improves.
- 3. Test a small Tuesday offer on slow-moving stock, then compare that day against the next two Tuesdays before scaling it.

Inventory Movement Check

Expected closing = opening stock + received stock + returns + adjustments - sold units.

Returns and adjustments are included explicitly in stock movement, even when their value is zero for this monthly dataset.

Opening Stock	Received Stock	Returns	Adjustments	Sold Units	Expected Closing	Closing Stock	Reconciliation Difference
5,027	3,920	0	0	5,041	3,906	3,906	0

AI Manager Explanation

Monthly Retail Snapshot – August 2026

All figures are in Indian Rupees (Rs.) unless otherwise noted.

1. Overall Store Performance

Metric	Value
Total revenue	Rs. 4,004,641.90
Total units sold	5,041
Total transactions	2,249
Average bill value	Rs. 1,780.63
Highest revenue day	15 Aug 2026 (Rs. 204,358.60)

2. Top Selling Products

Product	Units	Revenue	Transactions	COGS	Gross Margin (Rs.)	Gross Margin %
Basic Crew T-Shirt	576	Rs. 227,829.0	516	Rs. 91,008.0	Rs. 136,821.0	60.05 %

Product	Units	Revenue	Transactions	COGS	Gross Margin (Rs.)	G
Cotton Kurti	357	Rs. 356,643.0	321	Rs. 144,585.0	Rs. 212,058.0	59.46 %
Graphic Tee	318	Rs. 157,234.9	289	Rs. 65,190.0	Rs. 92,044.9	58.54 %

3. BottomPerforming Products

Product	Units	Revenue	Transactions	COGS	Gross Margin (Rs.)	G
Scarf	11	Rs. 5,039.9	9	Rs. 2,255.0	Rs. 2,784.90	55.26 %
Cap	22	Rs. 6,578.0	21	Rs. 2,310.0	Rs. 4,268.0	64.88 %
Anarkali Kurta Set	25	Rs. 36,159.9	23	Rs. 20,625.0	Rs. 15,534.90	42.96 %

4. Alpha Size Pressure (Key SizeBased Insights)

Size	Units Sold	Revenue	Stockout SKU Days	Ending Stock	Daily Unit Rate	Days of Cover
M	924	Rs. 675,192.8	31.0	410	29.81	13.76
L	984	Rs. 748,265.7	10.0	380	31.74	11.97
XL	408	Rs. 305,117.1	1.0	398	13.16	30.24

5. SlowMoving Alpha Sizes

Size	Units	Revenue	Stockout SKU Days	Ending Stock	Daily Unit Rate	Days of Cover
XS	146	Rs. 125,884.8	0.0	189	4.71	40.13
XL	408	Rs. 305,117.1	1.0	398	13.16	30.24
S	475	Rs. 364,431.9	0.0	380	15.32	24.80

Note: Other size systems (footwear, kids, OneSize) are excluded from this analysis.

6. Weekday Performance

Day	Units	Revenue	Invoices	Trading Dates	Avg. Revenue/Day
Monday	686	Rs. 551,747.5	304	5	Rs. 110,349.5
Tuesday	445	Rs. 346,354.0	198	4	Rs. 86,588.5
Wednesday	512	Rs. 411,548.8	241	4	Rs. 102,887.2
Thursday	543	Rs. 445,198.7	245	4	Rs. 111,299.68
Friday	611	Rs. 497,700.7	284	4	Rs. 124,425.18
Saturday	1,147	Rs. 890,660.2	488	5	Rs. 178,132.04
Sunday	1,097	Rs. 861,432.0	489	5	Rs. 172,286.40

7. Customer Segment Patterns

Segment	Category	Segment Share %	Store Share %	Lift	Support Units	Business Insight
Female – Adult (31■45)	Ethnic Wear	24.47	17.06	1.43	206	Ethnic Wear is 1.43× its store■average share in this segment.
Female – Young Adult (20■30)	Accessories	7.21	5.57	1.29	81	Accessories is 1.29× its store■average share in this segment.
Female – Senior (46+)	Ethnic Wear	21.05	17.06	1.23	40	Ethnic Wear is 1.23× its store■average share in this segment.
Male – Teen (13■19)	Tops	46.65	40.55	1.15	167	Tops is 1.15× its store■average share in

AI Usage Transparency

- Python calculated all numbers.
- AI only explained verified facts.
- Model used: openai/gpt-oss-20b via Groq OpenAI-compatible API.
- Temperature: 0.2.
- A deterministic fallback is available when the API is not configured or unavailable.
- No API key is written to report outputs.

Limitations

- Stockout evidence is counted at SKU level and does not mean a whole size was unavailable.
- Slow products may reflect demand, display, price, or stock depth; this report gives evidence-backed possibilities, not certainty.
- Gross margin is estimated from item cost data where available and is not net profit.
- Customer lift indicates association within one simulated month, not causation or real demographic truth.
