

Store Manager Retail Insight Report

Executive Snapshot

- Period analysed: 2026-08-01 to 2026-08-31.
- Revenue: Rs. 4,004,642; units sold: 5,041; invoices: 2,249.
- Average bill value: Rs. 1,781.
- Highest revenue date: 2026-08-15 with Rs. 204,359.
- Sales SKUs matched the active product master.

Question 1 Product Performance

Gross margin is revenue less product cost from product_master.csv; it is not net profit.

High volume + healthy margin means protect availability. Low volume + weak margin means review buying/markdown. Low volume + high margin means test display or bundling before discount.

Top 3 products by units sold:

Product	Units	Revenue	Gross Margin (%)	Manager Interpretation
Basic Crew T-Shirt	576	227,829	60.1%	High volume + healthy margin: protect availability.
Cotton Kurti	357	356,643	59.5%	High volume + healthy margin: protect availability.
Graphic Tee	318	157,235	58.5%	High volume + healthy margin: protect availability.

Bottom 3 products by units sold:

Product	Units	Revenue	Gross Margin (%)	Manager Interpretation
Scarf	11	5,040	55.3%	Low volume + high margin: test display or bundling before discount.
Cap	22	6,578	64.9%	Low volume + high margin: test display or bundling before discount.
Anarkali Kurta Set	25	36,160	43.0%	Low volume + high margin: test display or bundling before discount.

Question 2 Size and Inventory

- Alpha apparel size demand covers XS, S, M, L, and XL only.
- Size M has the strongest size pressure: 924 units sold and 31 stockout SKU-days.

- Size XS is the slowest alpha size: 146 units sold and about 40.1 days of cover.
- Other size systems such as footwear/kids/OneSize are excluded from the assignment size chart to avoid mixing size systems.

Question 3 Trading Days

- Strongest weekday: Saturday at Rs. 178,132 average revenue per trading day.
- Slowest weekday: Tuesday at Rs. 86,588 average revenue per trading day.
- Test a small Tuesday offer on slow-moving stock with margin tracking and compare against the next two Tuesdays before scaling; no sales increase is assumed.

Question 4 Customer Patterns

Lift compares each segment's category share with the overall store share. Patterns shown have at least 40 support units.

Segment	Category	Segment Share %	Store Share %	Lift	Support Units
Female - Adult (31-45)	Ethnic Wear	24.5%	17.1%	1.43x	206
Female - Young Adult (20-30)	Accessories	7.2%	5.6%	1.29x	81
Female - Senior (46+)	Ethnic Wear	21.1%	17.1%	1.23x	40
Male - Teen (13-19)	Tops	46.6%	40.5%	1.15x	167
Male - Senior (46+)	Tops	45.8%	40.5%	1.13x	92

- Female Adult segment over-indexes toward Ethnic Wear.
- Young Adult Female segment over-indexes toward Accessories.
- These are merchandising test signals, not demographic truth.

Question 5 Exactly 3 Actions for Next Week

1. Replenish Cotton Kurti size M first: it has 26 stockout SKU-days and 9.2 days of cover.
2. Review Scarf, Cap, Anarkali Kurta Set display, price, and next buy because low unit movement appears alongside stock remaining; test presentation before markdown.
3. Test a small Tuesday offer on slow-moving stock with margin tracking and compare against the next two Tuesdays before scaling.

Inventory Movement Check

Expected closing = opening stock + received stock + returns + adjustments - sold units.

Opening Stock	Received Stock	Returns	Adjustments	Sold Units	Expected Closing	Closing Stock	Reconciliation Difference
5,027	3,920	0	0	5,041	3,906	3,906	0

Reorder Priority

Recent daily velocity uses the final 7 calendar days available in the sales month.

Product	Size	Units Sold	Stockout Sku Days	Ending Stock	Recent Daily Velocity	Days of Cover	Reorder Priority
Cotton Kurti	M	79	26	17	1.9	9.2	High
Basic Crew T-Shirt	M	213	4	15	8.0	1.9	High
Basic Crew T-Shirt	L	177	3	15	7.0	2.1	High
Printed Top	L	74	3	25	2.3	10.9	High
Polo T-Shirt	L	71	1	33	2.4	13.6	High
Denim Jeggings	M	59	1	12	2.3	5.2	High
Denim Jeggings	L	65	1	14	2.0	7.0	High
Formal Shirt	L	73	2	30	1.7	17.5	Medium
Printed Top	XL	44	1	32	1.9	17.2	Medium
Cotton Kurti	L	138	0	35	5.1	6.8	Medium

Slow Stock / Markdown Priority

Review display/price first; markdown only if stock remains slow.

Product	Units Sold	Revenue	Gross Margin (%)	Ending Stock	Days of Cover	Markdown Priority
Scarf	11	5,040	55.3%	64	224.0	High
Cap	22	6,578	64.9%	34	79.3	High
Anarkali Kurta Set	25	36,160	43.0%	296	414.4	High
Sling Bag	29	20,271	59.2%	35	81.7	High
Kids Lehenga Set	64	80,278	53.0%	119	69.4	High
Kids Ethnic Kurta Set	97	96,903	57.0%	148	45.0	High
Ethnic Dupatta	26	15,574	59.9%	25	14.6	Medium
Wallet	30	14,970	60.9%	35	35.0	Medium
Handbag	30	29,970	59.0%	28	24.5	Medium
Hair Accessories Set	39	7,761	68.8%	43	33.4	Medium

AI Usage Transparency

Manager interpretation (maximum 180 words):

Basic Crew T-Shirt leads unit sales, while Scarf needs closer sell-through review. The clearest replenishment pressure is Cotton Kurti size M, with 26 stockout SKU-days and 9.2 days of cover. Saturday has the strongest average revenue per trading day. Female Adult segment over-indexes toward Ethnic Wear. Young Adult Female segment over-indexes toward Accessories. These customer patterns are merchandising test signals, not demographic truth.

- Python calculated all numbers and exactly three actions.
- AI, when configured, only interpreted verified facts.
- Model metadata: openai/gpt-oss-20b via Groq OpenAI-compatible API; temperature 0.2.
- A deterministic fallback is used when the API is not configured or unavailable.
- No API key or technical service detail is written to outputs.

Limitations

- Stockout evidence is SKU-level and does not prove a whole size was unavailable or quantify lost sales.
- Slow movement can reflect demand, display, price, or stock depth; priority labels are review signals.
- Gross margin is estimated from available item cost data and is not net profit.
- Customer lift is association within one month, not causation or demographic truth.
